SUMMARY

Senior data analyst with 8+ years leading Python/SQL-driven analytics for healthcare and enterprise teams — cut manual review effort 65% (~\$100K/year saved) and recognized with a company-wide award for measurable business impact.

EXPERIENCE

Senior Data Analyst

Mar. 2022 – Present

MRO

- Designed and maintain an automated sampling algorithm (Python, SQL, Airflow), cutting manual case-selection effort 65% and sustaining ~\$100K/year in savings.
- Built a dual-model partner risk system (logistic regression + XGBoost) combining account- and project-level signals; reduced attrition 12% YoY and spurred a company-wide partner scorecard initiative.
- Lead analytics and ML initiatives across product, engineering, client services, and finance, aligning stakeholders and converting insights into operational decisions.
- Train peers on Python, SQL, and Git; established team coding standards and centralized documentation to improve reuse.
- Awarded the company-wide DASH Award (2025, ~20–25 recipients org-wide) for excellence and measurable business impact.

Data Analyst

Nov. 2021 – Mar. 2022

Detroit Employment Solutions Corporation

- Redesigned business processes with SQL and Python, cutting workflow steps and accelerating reporting cycles.
- Rebuilt and normalized databases for reporting and dashboards across multiple teams, including table design and query optimization.
- Explored and visualized large datasets to generate insights supporting program and data teams.

Data Analyst

Jun. 2021 – Nov. 2021

Inmar Intelligence

- Built SQL-based data reporting solutions surfacing insights into business operations, enabling faster stakeholder decisions.
- Investigated and resolved data discrepancies through root cause analysis, supporting analytical workflows and data quality standards.

Project Manager & Analytics Specialist

Sept. 2018 – Jun. 2021

City of Detroit

- Led a citywide initiative to unify document storage and onboarding systems, coordinating vendors, rollout schedules, and training across departments.
- Supported HR operations and analytics for large city departments (Fire, Water, Public Works), addressing workforce needs across employee populations of thousands.
- Managed concurrent projects and direct reports, driving timelines, deliverables, and stakeholder expectations at scale.
- Partnered with department leaders to translate workforce needs into operational reporting and dashboards (SQL, Excel, Tableau, Python).

EDUCATION

Johns Hopkins University

Aug. 2019 – May 2021

Master of Science in Applied Mathematics

TECHNICAL SKILLS

Languages & Query: Python, SQL (Postgres), R/RStudio

Pipelines & Visualization: dbt, Airflow, Tableau, Power BI

ML & AI: Scikit-learn, XGBoost, PyCaret, PyTorch, Matplotlib, Seaborn, LangChain, VectorDB, Claude API

Developer Tools: Git, VS Code, Docker
